WHITEPAPER

EXECUTIVE SUMMARY

MoonKat (\$MKAT) is a community driven project built on Binance Smart Chain #BSC. MoonKat brings the most disruptive approach to BSC ecosystem:

A community based project which ensures that holders of \$MKAT are entitled to receive BNB through the community pool system.

You don't have to do anything to Earn BNB, just hold \$MKAT in your wallet.

KEY FEATURES

COMMUNITY BUILT

We locked 75% of the total supply on Pancake Swap. To ensure a fair and complete distribution, the MoonKat team owns 5% of all tokens which is cliffed for 6 months. We did this to avoid the situation where team members dump tokens as they deem fit. For the first 6 months everyone has to buy on the open market.

AUTOMATIC LIQUIDITY POOL

2% of every transaction contributes toward automatically generating further liquidity on Pancake Swap. Benefiting long term \$MKAT holders the most!

• EARN \$BNB REWARD

3% of every transaction is taken and re-distributed to \$MKAT holders in \$BNB.

ANTI PUMP-DUMP-EXIT WHALES

Transactions (sell/buy) that trade more than 0.01% of the total supply will be charged. Whales who make a transfer (between 2 wallets) that is larger than 0.01% of the total supply will be charged for 2.5 BNB.

TOKEN ECONOMICS

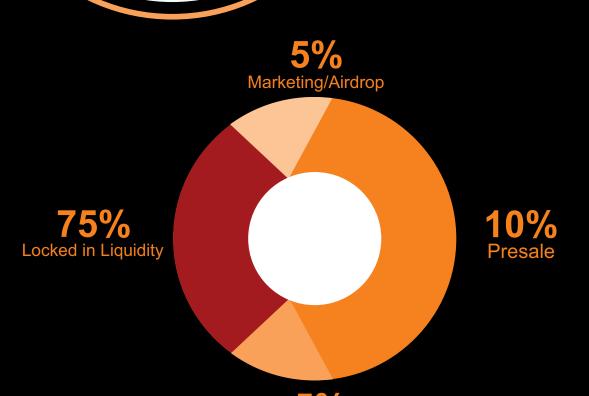

1 Billion

Token Name: \$MKAT

Total Supply: 1,000,000,000

Community Development

HOW TO EARN BNB

3% of every transaction is taken and re-distributed to all \$MKAT holders in \$BNB.

Moonkat is a community-driven project and we want to uphold fairness and equality. If you collect more than 1 BNB, 20% of it will be used to buy back \$MKAT at the market price and burn them immediately. This feature helps deflate the supply and increase the price of \$MKAT for long term holders.

Top-Up rate: In this waiting duration, if you continue to add more than 2% (threshHoldTopUpRate) of your \$MKAT balance, the waiting duration will proportionally add up with the cycle. If you sell \$MKAT, it does not affect your cycle. For example, on the first day of your cycle, you add up more 5% \$MKAT, you have to wait: 5% * 7days (168 hours) = 8,4 hours more. That means you can collect BNB after 7 days and 8,4 hours. But if the threshHoldTopUpRate >= 100%, the waiting duration will add up to 7 days.

For example, on the first day of your cycle, you add up 100% \$MKAT, you have to wait: 7 days more. That means you can collect BNB after 14 days.

This will prevent cheaters who try to add more \$MKAT at the end of each cycle.

COLLECT BNB TAX

As a community-driven project and would love to promote equality.

If you collect more than 2 BNB, 20% of it will be used to buy back \$MKAT at the market price and burn them immediately. This feature helps deflate the supply and increase the price of \$MKAT for long-term \$MKAT holders.

ZERO-BALANCE PUNISHMENT

What is Zero Balance?

When you sell all of your MKAT and your balance = 0.

Then you continue to buy \$MKAT again. Your next collectable date will be extended over 50 years.

What can you do?

If you still want to collect BNB, you can transfer your \$MKAT to another wallet.

Then you can collect your BNB normally without waiting for over 50 years.

Remember you will be charged 10% when transferring between wallets.

MOONKAT NFTS

Our superb use case enables all kitty lovers to mint unique NFTS for their pets, print and wear on their cats. These Cards can be further traded on the platform. More details will be released before the official launch of our NFT platform.

THE KITTY FOUNDATION

We are not blind to the harsh treatments given to kitties worldwide, especially physically deformed kitties, we believe every kitty is unique in their own way. We will provide easy donation access to different feline charities world wide.

DISCLAIMER
